Riello Galatrek Launches Unique Business Continuity and Data Security Seminars

The Riello Galatrek Business Continuity and Data Security Seminars offer a one stop source of information for professional engineers, consultants and senior managers involved in the design and management of data security infrastructures. Starting in February, the morning seminars bring together leading specialist companies to help build a knowledge base that can be used in the protection of single server racks or the design of large Electronic Data Centres (EDC).

In addition to The IEE, Riello Galatrek has invited companies such as Furse (part of Thomas and Betts), Secure IT, AST and Sinetica Corporation to speak at sessions covering power, lightning, surge and radio frequency interference (RFI) protection, data suite cabling, design and security, environmental and power management.

All attendees will receive a certificate to contribute towards their Continuous Professional Development hours and be entered into a free prize draw for corporate hospitality match day tickets or an equivalent event.

Seminar details can be found at www.riello-upstec.co.uk including an on-line booking form. Spaces can be also be reserved by email (tec@riello-ups.co.uk) or through the special hotline 0800 269 394. The seminar locations and dates include:

- The Oval Ground, London – February 22
- Millennium Stadium, Cardiff – February 23
- Edgbaston Cricket Ground, Birmingham – February 24
