

New Product Release

release date: immediately

from Riello UPS Ltd - UK subsidiary of Riello UPS (RPS S.p.A)

Riello Multi Plus Provides Energy Saving Power Protection

Leading the field in environmentally friendly power protection, the Riello Multi Plus UPS sets the specification for energy saving, flexibility and electrical performance. The latest 30kVA and 40kVA modules are designed to power mini data centres (running 80 to 100 servers) but can be scaled using a decentralised parallel architecture for larger installations.

Energy and Cost Efficiency

Within a data centre environment, energy management is critical. Running costs need to be minimized and environmental concerns addressed, while still offering optimum resilience and power protection. Ideal for the protection of critical information and telecommunication networks, the Multi Plus is designed to meet the specific energy demands of this high-pressure environment. "IT and data centre applications are under increasing pressure to balance ever-increasing energy demands with ever-reducing budgets", comments Robin Koffler, General Manager of Riello UPS Ltd. "By installing more efficient UPS systems such as the Riello Multi Plus range, the juggling act between resilience, efficiency and total cost of ownership suddenly becomes a lot easier".

The exceptional quality of the components and technology used by Riello allow the Multi Plus UPS to operate with an industry-leading on-line efficiency of up to **96.5%**. This can provide up to a **50% saving** in energy usage per annum compared to traditional UPS.

Independently tested, and rated as a Level 6 product on Riello's unique Eco Energy Level Scale, the Multi Plus range achieves exceptional performance with a surprisingly small footprint – freeing up valuable floor-space. Multi Plus also has a range of advanced battery optimisation features; extending the average working life of a battery set and reducing lifetime management costs.

Advanced Technology and Communication

The advanced design of the Multi Plus UPS makes it easy to install – especially on sites that have limited power capacity, generators or problems with harmonics. It has zero-impact on its upstream power supply, and also acts as filter and phase-shift protection device.

New Product Release

release date: immediately

from Riello UPS Ltd - UK subsidiary of Riello UPS (RPS S.p.A)

Multi Plus also has a sophisticated range of communications options, including a front graphic display panel providing real-time measurements, operating status, and alarm conditions in five different languages. The UPS has a variety of options for remote monitoring, extended runtime applications (30kVA 9mins to +1hr & 40kVA 6mins to 40mins), temperature monitoring, electrical isolation and power distribution.

Adaptable Protection

Thanks to a variety of configurations, available accessories and covered by Riello's popular service options, the Multi Plus range is also one of the most flexible UPS available today. Suitable for a wide variety of applications, the Multi Plus is one of the best UPS for the protection of high-density loads (such as blade servers) within data centre environments. Up to six modules can be operated in parallel and various operating modes allow users to alter operations to best meet the needs of their loads (and their business).

The Multi Plus range from Riello UPS is available in a range of power rating; with the 30 and 40kVA models available as three phase input and out models, with double conversion on-line technology. Prices start at £8411 plus delivery and VAT.

For more information on the Multi Plus range, please visit www.riello-ups.co.uk, email sales@riello-ups.co.uk or call the sales hotline on 0800 269 394.

About Riello UPS Ltd

Riello UPS is the UK subsidiary of Riello UPS (RPS S.p.A), Europe's leading manufacturer of uninterruptible power supplies (UPS) and standby power systems from 350VA to 6MVA. The company is part of the Riello Elettronica group and has subsidiary companies and support offices across the world. Riello UPS is an official sponsor of the Ducati Corse Superbike team.

Riello UPS operates from two research and manufacturing facilities in Italy - Legnago (near Verona) and Milan. The head office is based at the Legnago facility which is also responsible for UPS design and manufacture up to 80kVA. The Milan facility is responsible for the larger UPS range up to 800KVA. Many of the UK's high-profile computer systems and industrial installations are protected by Riello solutions. Customers include Cable & Wireless, University of Edinburgh Super Computer, Grattan logistics, ING Direct, Lotus, Cumberland Building Society and Tyne Tunnel. Across the group, high-profile international customers include Frankfurt Airport, Audi, Volvo and Beijing Airport.
